I use
IDEA.

"IDEA is a great tool which has helped us increase audit efficiency, improve communication, analyze data and better deliver the services that our clients desire. It is vital to have a tool that permits us to analyze electronic accounting data with varying degrees of sophistication and obtain the "big picture" in a short amount of time. IDEA provides user friendly tools and menus which allow us to do just that! With IDEA, we have the ability to secure and import information from software systems. We can then identify exceptions, summarize general ledger data, age accounts and compare IDEA generated reports to system sourced reports."

Brown, Graham & Company, P.C. is a regional public accounting and consulting firm based in Texas. Its 55 year history, diverse experience and progressive strategic goals combine to provide exceptional security to its clients now and for generations to come.

IDEA can read, display, analyze, manipulate, sample or extract from data files from almost any source. Lower your audit cost, add more quality to your work and meet professional standards.

Be a better auditor.
You have the knowledge.
We have the tools.
