

The software solution for exporting and
auditing SAP® data:

SmartExporter

Exporting SAP® quickly and easily

Fast and easy? SmartExporter

Not familiar with SAP®? No problem.

Make complex, time-consuming SAP® features a thing of the past. Thanks to SmartExporter you can generate your data request where you are most comfortable — on your own computer: SmartExporter supports you in the complex task of selecting SAP® data: After configuring the data request defining the tables, fields and filters once, you can save it as a favorite and reuse it whenever you need.

It is also possible to integrate SmartExporter into IDEA or AIS TaxAudit Professional. After selecting your audit steps, SmartExporter identifies the SAP® data you actually need. Once the export is complete, you can analyze the exported data directly in IDEA or AIS TaxAudit Professional.

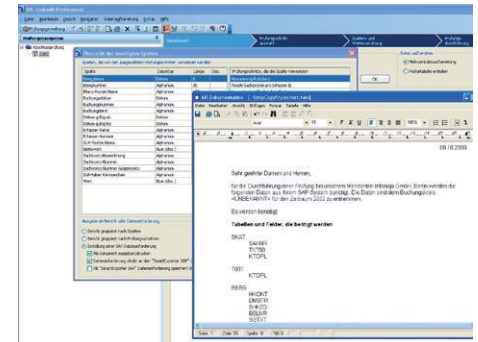

Online? Offline? Both.

SmartExporter offers you two ways to export data:

You can either connect to the SAP® system and export the SAP® data directly: Synchronous with small and asynchronous with large volumes of data.

Or you can work offline without access to the SAP® system, which for instance might be the case with external auditors. You would then generate a data request with SmartExporter, transfer it to the person in charge of the SAP® system who will provide the data you need. The SAP® data requested will be provided e.g. on a storage medium.

Whether online or offline, SmartExporter allows you to schedule exports based on the current system workload or for a specific time during off-peak hours, e.g., at night or on weekends.

Fast and easy? SmartExporter

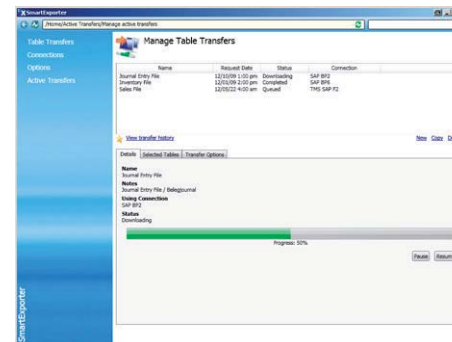

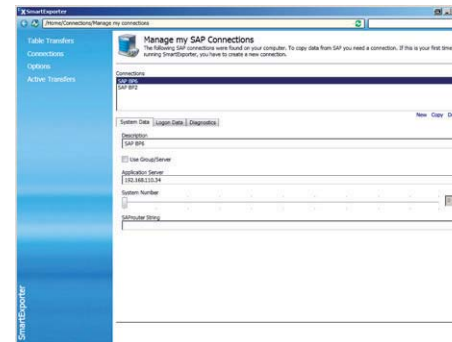

SmartExporter: Safe as can be!

SmartExporter is secure. User access to SAP® data is limited by the existing SAP® access privileges. In addition, custom access privileges can also be defined.

Because access is restricted, data is displayed as read-only content. The original SAP® data cannot be edited.

All actions can be traced at any time, as they are recorded by a unique ID on the client or SAP® side. This ensures maximum transparency when using SmartExporter.

A further benefit: With SmartExporter, you create files according to the GDPdU default data structure.

Technical specifications

Technical specifications:

- Output formats: IMD (IDEA), CSV, Access and TXT files, file formatted according to the default data structure
- Access to all transparent SAP® ERP tables including database views, pooled tables, and cluster tables
- Communicates with SAP® system via LIBRFC using RFC modules
- Supported SAP® minimum release: 4.6c (Unicode/non-Unicode)
- Runson Windows XP SP2, Vista with Microsoft .NET Framework 3.5 SP1, Windows 7

Success guaranteed.

We offer a wide range of seminars to help you learn how to effectively use our software solutions. The content is tailored to suit your everyday practical needs. Take advantage of the many years of experience our instructors have to offer and make full use of the features available with your software solutions.

Our product training courses, in-house seminars, and workshops teach you how to get the most out of your Audicon solutions. Save time by learning useful tricks and thus gain greater flexibility for your other important everyday tasks.

Are you looking to save time and keep travel expenses to a minimum? Audicon seminars can be booked as external seminars or, on request, held in-house at your company. Many subjects are also available as online courses.

Visit any of the following Audicon seminars to put you a step ahead:

- IDEA/AIS TaxAudit seminars
- IDEAScript course
- Workshop on SAP® data analysis with IDEA/AIS TaxAudit Professional
- Workshop on practical auditing methods for IDEA

Please see our training schedule at www.audicon.net/services.

You can either wait for the future to come. Or, better yet, meet it halfway.

For 15 years, Audicon has been market leader in data analysis, auditing, and reporting solutions. As the official vendor of the German tax authorities, we offer state-of-the-art solutions. Audicon establishes the benchmark for data quality, security, and efficiency.

Along with leading-edge know-how, having close customer relations and a sense for their requirements is needed. We therefore work to seek answers to tomorrow's technical questions.

This is something that characterizes each of our employees and Audicon as a whole. Our slogan "we care" is part of our claim to support you in successfully completing your tasks at any time. This is our claim as a market leader, something we put to the test each and every day.

Promised.
